➢ Profile Summary

I'm Ahmad Sohail Jalal, a passionate frontend developer from Kabul.
I specialize in building clean and responsive websites using HTML, CSS, and JavaScript.
Although I am still new to the field, I have already completed a few small projects and continue to learn every day.
I enjoy turning ideas into real web pages and solving problems creatively.
I am currently building my portfolio and excited to work with global clients through remote opportunities.

WORK EXPERIENCE

- ### Contact Form

  Developed a responsive contact form using HTML, CSS, and JavaScript. Designed for mobile and desktop compatibility. Hosted on GitHub Pages.

  https://sohail-jalal.github.io/

- ### Library Database App (BOOK DB)

  Built an Android application using Android Studio and SQLite to manage book records. Features include add, update, delete, and search functionality. Developed as part of university coursework.
